

12. Instructions for Phase 3

The purpose of this phase of the PAT is to:

- Interpret data and information, combine and remix the information to show your own understanding and insight and to answer the focus question
- Complete the report by using good word processing principles and techniques; and
- Create a website using html that takes into consideration appropriate layout, readability and other usability issues

Report

In order to communicate the knowledge and insight that you have gained, as well as the recommendations/solutions to the problem, you need to continue working on the report that you created in Phases 1 and 2 and add your findings and solutions. Use the data and information from Phase 2 and the understanding and insight that you have gained through your investigation to complete the report. Your report should, as a guide, consist of approximately 1 600–2 000 words (content only, excluding cover page, table of contents, references and graphics).

Your report needs to be, as a guide, 6–8 pages long with the following sections:

- A cover page
- An introduction
- Discussion and analysis
- The findings and conclusions
- Any appendices that are needed

NOTE:

You should use the graphs and database queries that you generated to enhance the discussion, analysis and findings in your report.

Suitable headings must appear in these sections. The categories, created in Phase 1, now become headings.

1. Copy the report from Phase 2 to the relevant Phase 3 folder (if not done already).
2. Note that over and above any specific instructions below, you need to apply the word processing skills you have learnt to produce a professional document. Take note of the style guide in **APPENDIX B and the notes on referencing below:**

REFERENCING

- Using the information in Phase 1, add an automatically generated reference list/bibliography using the features of your word processor. Ensure sources used are referenced clearly and appropriately.
- All the information you need should be found in the (summary) documents you created in Phases 1 and 2.
- Any graphics from other sources must be acknowledged clearly and appropriately.
- Automatic, appropriate captions must be inserted correctly for all tables/figures.
- Make sure that you do not plagiarise and use citations and/or footnotes appropriately using a referencing style such as Harvard or APA.

NOTE: Your report must be written in **your own words**, except where information is correctly cited/acknowledged. You will be heavily penalised if you copy and paste large sections of text directly from the internet or any other source. Plagiarism is completely unacceptable. Be original and creative.

3. Complete the cover page.

- You should have added a cover page in Phase 1. Ensure that you have a professional-looking, well-structured cover page using **appropriate content controls**, with:
 - Your name and surname
 - The name of your school
 - The subject name
 - The PAT topic you chose
- Now add a meaningful abstract/extract in a suitable content control.

An abstract is a brief summary (3–4 lines as a guideline) of the contents of the report. After reading the abstract, readers should be aware of the content of the report so that they can know, at a glance, whether or not they wish to read the full report.

Note that the abstract is not an introduction to but rather an overview of the content and purpose of the report and should include a very brief mention of the findings.

TIP: You are advised to recheck your abstract after you have completed the report.

4. Add an automatic table of contents and table of figures.

- Add a provisional, automatically generated table of contents and table of figures once you have decided on the styles you are going to use for your headings.
- Remember to update these tables once you have completed the report.

5. Write your introduction.

- Give a clear overview and focus of the original problem.
- Clearly state the focus and purpose of the investigation, pointing out which aspects you investigated.
- Make sure you do not add any additional, unnecessary information.

TIP: Consider your task definition and focus question when compiling your introduction but do not simply use them verbatim.

6. Discussion and analysis

- You already have some headings added to your report, but you may need to add additional headings and subheadings to the report as this will allow you to group the relevant information together in a logical fashion.
- Add information from Phases 1 and 2 (summaries, questionnaire, spreadsheet and database) and all information/data/graphics (tables, graphs, charts, pictures) as needed. Make sure the data and information added is relevant to the investigation.
- Adding hyperlinks:
 - Hyperlinks/Bookmarks must be used to navigate to other websites and external documents, for example, the spreadsheet and database from Phase 2.
 - Hyperlinks to these external data/information sources must be easy to locate and recognise/'understand'.

7. Formulating your findings.

- You need to formulate at least **THREE** appropriate claims, arguments or findings that are appropriate and relevant to the investigation (**as guided by your focus question**).
- All these claims, arguments and findings must be:
 - Answers to your focus question and research questions
 - Supported by relevant, appropriate data/information/graphs/diagrams, etc.
 - Meaningful explanations of how or why the evidence supports these findings
 - Drawn from information presented in the report and address the original problem statement/focus in light of the evidence presented

8. Formulating your conclusion(s).

Your conclusion(s) must:

- Be meaningful and logical
- Address the original problem statement/focus in light of the evidence presented

The conclusion(s) should NOT contain new information that is not researched.

9. Once you have completed the report, do a final check in terms of the formatting and references covered in point 2 and remember to update the tables of contents and figures.

Website

In order to share the knowledge and insight you have gained with a broader audience, you need to create a website. This will serve as a 'summarised, visual' version of your report. Do not simply repeat the entire report in HTML format.

10. Create a website with a home page linked to at least **TWO** other webpages. Save it and all associated images in the relevant subfolder in your Phase 3 folder, using meaningful file names.
11. Your website should include at least the following:
 - A title
 - An introduction
 - A functional navigation system
 - Good quality information about the topic/your investigation, that is factually correct. The information should be structured for a website, using appropriate principles and techniques, such as headings, paragraphs, lists, horizontal lines, etc.
 - Graphics and/or images
 - Hyperlinks to other good quality information where appropriate. These could also be the websites that you identified in Phase 1 as potential sources of information.
12. Ensure that your website is well laid out, readable and has a consistent appearance. It should be easy to skim/scan the website and to find important information.
13. Different elements/parts of the pages must be clearly distinguishable.
14. Graphics/Images should be relevant to the topic or purpose of the site, enhance understanding, display correctly and be of a high quality. They must be appropriately sized and cropped. It should also take into account visually impaired users.

15. Use good Standard English and ensure there are no spelling or grammar mistakes.
16. Acknowledge information and graphics used from other sources appropriately.

Hand-in for Phase 3

Once you have completed this phase of the project, submit a copy of your entire PAT folder to your teacher:

The following should be in your Phase 3 folder:

- ☐ The word processing report you completed in this phase.
- ☐ The website you created in this phase (home page linked to at least two other web pages) together with any resources needed for the website (graphics, etc.).

NOTE: You also need to complete and hand in the final declaration (**APPENDIX C**).

Your teacher will give you the date on which to submit your Phase 3 work for assessment. If you are unable to meet the deadline set, you will need to provide a valid reason.
